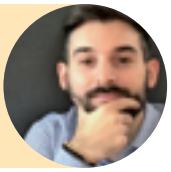
VITAL SUSPENSIONS



VITAL cosa significa?

Guido Ardengo: "**Cinque lettere che caratterizzano... una molteplicitò di significati!**
Innanzi tutto è una parola internazionale cucita a misura della nostra filosofia di lavoro, sempre dinamica e propositiva. Non solo, è anche la nostra missione: fare ammortizzatori che siano "Vital", mantengano la qualità vitale della loro funzione attiva e passiva per una guida a sua volta: Vital!
Ma Vital contiene anche "ital" a suggellare la nostra sincera e fattiva italianità, contiene le iniziali di Vittorio Veneto la città veneta della nostra sede e contiene "Al", iniziale di Alfeo Moret, colui che ha voluto e creato questa azienda nel 1973, e che le ha dato quello spirito di intraprendenza che oggi è il nostro successo."

What does VITAL mean?

Guido Ardengo: "**A five letter multiple meaning word!**
First of all, it is an international word that perfectly matches our work philosophy always proactive and dynamic. It then represents our company's mission; to produce shock absorbers that are truly VITAL, able to maintain their high quality long lasting active and passive functioning guaranteeing in turn a VITAL driving experience. However, to consolidate the genuine Italian authenticity that we proudly incorporate, VITAL contains "ITAL", but also the initials of the Venetian city, Vittorio Veneto, where we are located.
Above all, VITAL, includes an essential component, "AL", initials for Alfeo Moret, the father founder of our company, who already in 1973 established this company with a great entrepreneurial spirit and futurist vision which have laid the foundation of our current success."

CONDIZIONI DI GARANZIA: La garanzia di due anni applicata a tutti gli ammortizzatori copre esclusivamente le non conformità, verificate sugli ammortizzatori stessi, relativamente a vizi di fabbricazione e di funzionamento.
La garanzia del prodotto, in quanto tale, vale esclusivamente nei termini di sostituzione gratuita del materiale riconosciuto difettoso.
Tale garanzia inoltre si ritiene valida per il solo prodotto riconosciuto non conforme, pertanto non prevede estensioni a coppie o insiemi di ammortizzatori, anche se installati sul medesimo veicolo.

- I danni causati da manomissioni di qualsiasi natura apportate all'ammortizzatore.

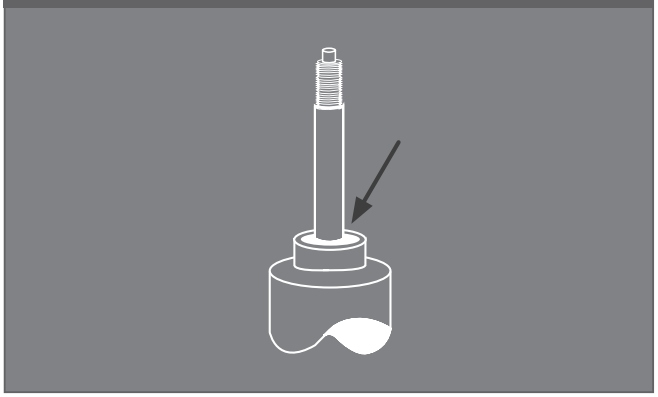
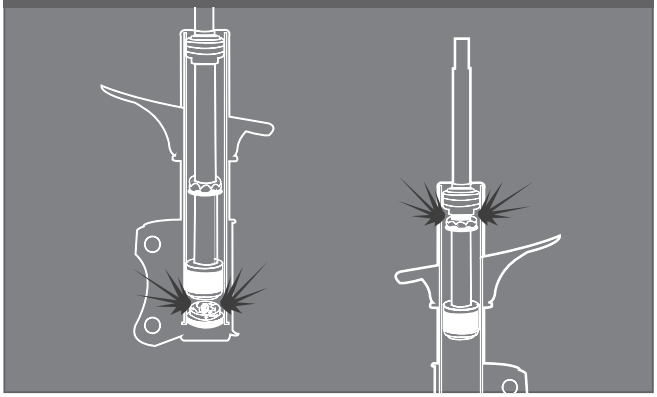
PARAOLIO SCOPPIATO



Ammortizzatore che presenta una slabbratura della guarnizione di tenuta con conseguente perdita di olio e quindi rottura dell'ammortizzatore, dovuta alla NON sostituzione del tampone di fine corsa deteriorato e quindi al non rispetto del suo corretto funzionamento come assorbitore d'urti.

A shock absorber with burring on the gasket and consequent oil leak, which would lead to the shock absorber breaking. This is caused by failure to replace the worn rubber rebound bumper, which is unable to absorb any impact.

SFONDAMENTO DI FINECORSA



Sfondamento della valvola di fondo dell'ammortizzatore e del pistone a causa del continuo lavoro a fine corsa inferiore dell'ammortizzatore causato da percorrenza in strade dissestate e da continui dossi rompi velocità con conseguente deterioramento del tampone di fine corsa e del cedimento progressivo della molla di sospensione. Risultato perdita olio, effetto elastico e non funzionamento dell'ammortizzatore.

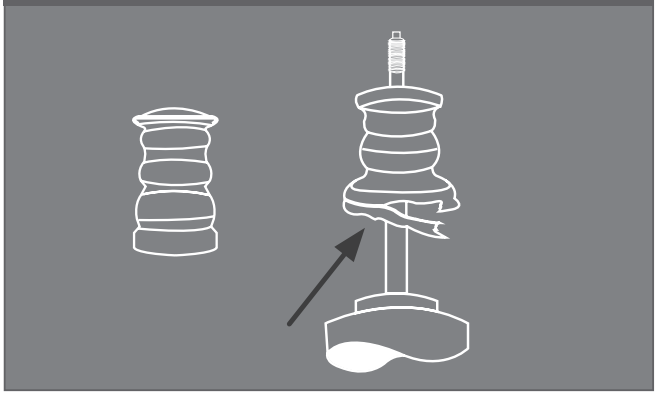
A smashed bottom valve and piston rod due to continued working of the shock absorber at the bottom, caused by uneven road surfaces or speed humps, which damage the rubber rebound bumper and gradually cause the suspension spring to give way. The result is leaking oil, reduced elastic effect and ineffective shock absorber.

GLOBO®

PRINCIPALI CAUSE DI DANNEGGIAMENTO NON IMPUTABILI A DIFETTOSITÀ DEL PRODOTTO

PRINCIPLE DEFECTS DUE TO IMPROPER HANDLING OF PRODCUT

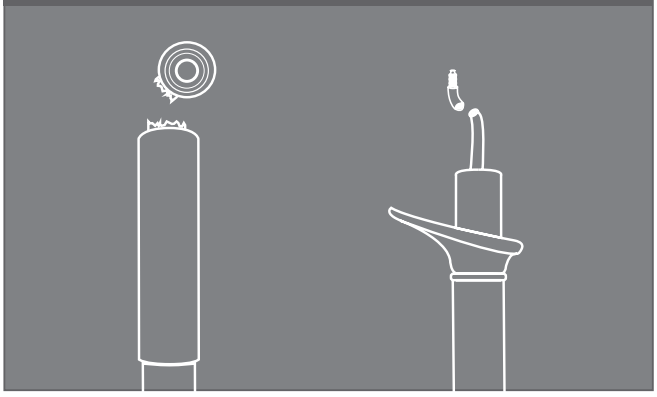
ROTTURA TAMPONE DI FINECORSA



Ammortizzatore danneggiato per usura del tampone di fine corsa, dove soprattutto con il nuovo e massiccio impiego da parte dei costruttori del poliuretano microcellulare che evita in parte anche il sovraccarico del mezzo, il tampone si deteriora rapidamente sia come sfrangiatura che come rigidità con conseguente rottura dell'ammortizzatore per urti di fine corsa inferiore.

A shock absorber damaged by a worn rubber rebound bumper due to the massive use by manufacturers of microcell polyurethane to make the bumpers, which avoid part of the shock absorber overload. With excessive work the bumper deteriorates, disintegrates and becomes hard, and therefore the shock absorber breaks due to closing impact.

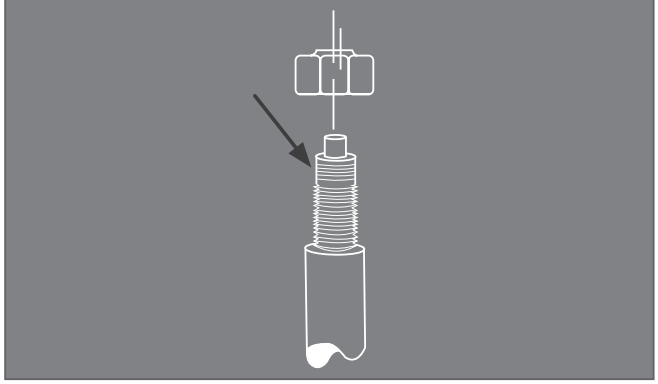
ROTTURA OCCHIELLI E PERNI



Ammortizzatore che presenta il distacco dell'occhiello (o del perno) dovuto ad un urto, o nel caso del perno, al non corretto montaggio con il giusto serraggio di coppia eseguito con le attrezzature non corrette, utilizzando la pistola pneumatica anziché la chiave dinamometrica. Il distacco dell'occhiello può avvenire anche nel caso in cui il fissaggio dell'ammortizzatore sia stato fatto ancora a veicolo sollevato, anziché con le ruote appoggiate al terreno e quindi con l'ammortizzatore nella corretta posizione di lavoro.

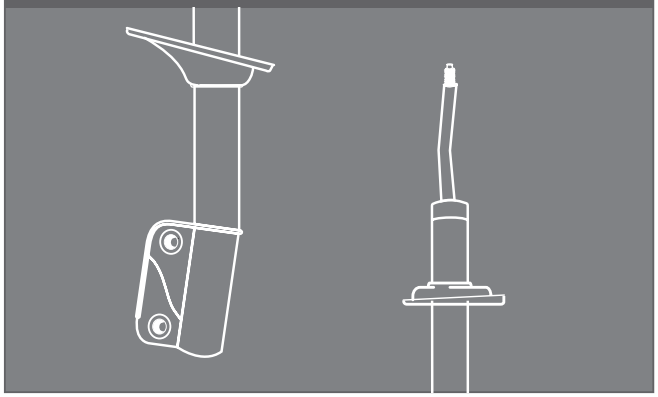
A shock absorber with a broken grommet (or pin), caused by a collision or incorrectly mounting the pin using the wrong tools (e.g. pneumatic screwer instead of a torque wrench). The grommet could also detach when the shock absorber has been mounted with the vehicle lifted off the ground and not with the wheels on the ground, which is the correct position to work the shock absorber.

FILETTATURA ROVINATA



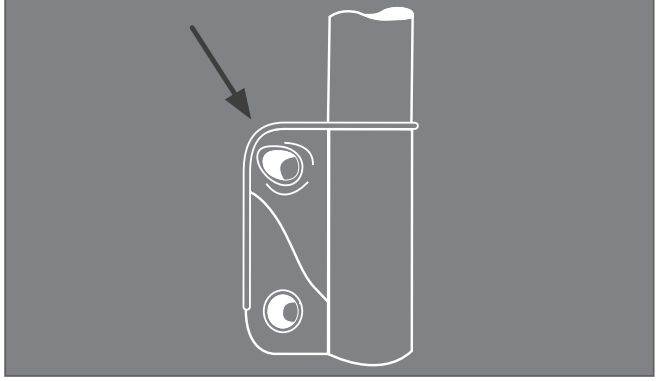
Ammortizzatore che presenta il filetto rovinato, in quanto nel montaggio non è stato utilizzato il KIT di viti corredato, bensì un dado di passo diverso da quello fornito, e soprattutto perché si è utilizzato la pistola pneumatica e non invece la chiave dinamometrica.
A shock absorber with ruined thread, due to being mounted without using the supplied screws, but just a nut with a different pitch to the one supplied. Using a pneumatic screwer instead of a torque wrench can also cause this damage.

AMMORTIZZATORE STORTO



Ammortizzatore che si presenta piegato, o solo con l'albero storto, oppure il corpo piegato; normalmente questo avviene nel caso dell'albero storto, quando il veicolo urta uno scalino nella strada, mentre la piegatura del corpo dell'ammortizzare nel caso di incidente piu' o meno marcato.
A shock absorber with twisted bracket, body or pin. If the piston is twisted it is normally due to impact with a kerb, while a twisted body is caused by a more serious accident.

FORI ATTACCO MODIFICATI

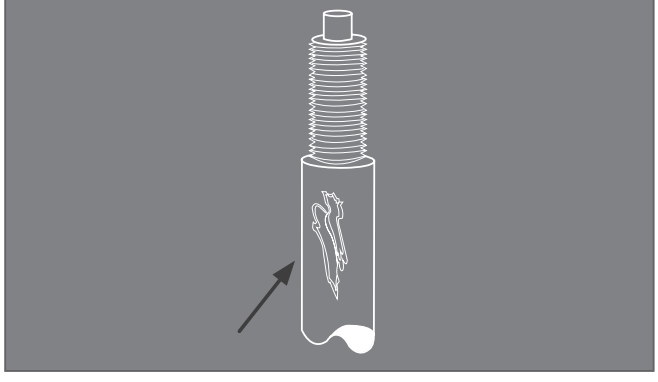


Ammortizzatore che presenta una allargatura manuale del foro di attacco al mozzo ruota in fase di controllo della geometria del veicolo, dovuto principalmente a fattori accidentali che il veicolo ha subito sulla strada, come incidenti e urti vari con conseguente spostamento degli assi di camber.
The shock absorber has a manual widening of the wheel hub attachment hole during alignment, which is caused by road accidents that cause the camber axle to move.

STELO ROVINATO E ARRUGGINITO

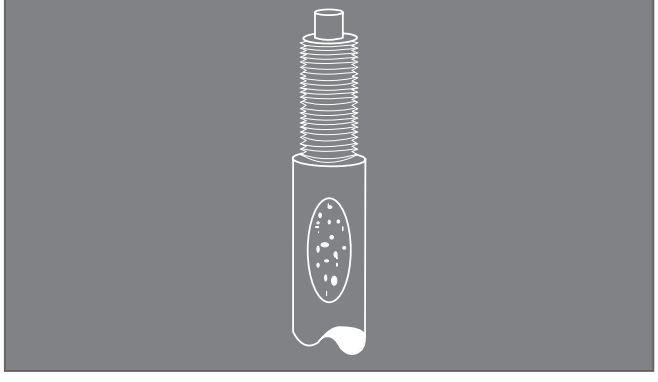
Superficie cromata dello stelo rovinata da ammaccature, botte e ruggine con conseguente perdita di olio attraverso il paraolio, difetto questo dovuto nella fase di montaggio dal non corretto fissaggio e protezione del soffietto parapolvere e del tampone di fine corsa.
The piston rod chrome-plated surface is ruined by dents, knocks and rust, with oil leaking through the oil retainer. This fault is caused by incorrectly mounting the rubber rebound bumper and the dust cover.

ALBERO ROVINATO CON LA PINZA



Ammortizzatore che presenta l'albero cromato con evidenti segni di graffiatura della superficie cromata, con conseguente perdita di olio e gas ogni qual volta la parte danneggiata entra nella guarnizione a tenuta di gomma. Danno causato dal non corretto impiego di utensili idonei al montaggio degli ammortizzatori.
A shock absorber with clear signs of scratching on the chrome plated surface of the piston rod, causing oil and gas leaks each time the damaged part enters the gasket. Damage caused by using incorrect tools to mount the shock absorber.

ALBERO USURATO



Ammortizzatore che presenta l'albero cromato danneggiato solo da un lato con evidente zona ovale arrugginita o quantomeno molto lucida e quindi consumata rispetto al resto della cromatura. Pistone quindi sottoposto ad un grosso carico laterale dovuto al non coretto serraggio con ruote a terra e soprattutto al non corretto camber del veicolo.
A shock absorber with the piston rod damaged on just one side, with a clear rusty or shiny oval patch and extensive wear with respect to the rest. The piston rod is subject to heavy side load, caused by incorrect mounting of the wheels on the ground and incorrect alignment.
